INTRODUCTION

What is 80/20 Spanish?

Let's start off with what it's not. Mastery of a language requires prolonged and intensive study. 80/20 Spanish is not that! If you'd like to speak Spanish like a local, I'd suggest you check out <http://learnspanishlikecrazy.org/>

This e-book is based on the Pareto principle or 80/20 rule. We'll explain that a bit more in the e-book, but in a nutshell you will only be learning the minimum amount of Spanish you need to know, to give the biggest bang for your buck, so to speak. Minimum time and effort, giving maximum results and effect. For most languages there are around one hundred words that if you learn you will be able to make yourself understood in that language.

This short e-book will give you those 100 words (plus a few more) that you need to know. Learning these hundred words will not allow you to speak Spanish fluently but it will allow you to communicate with another native speaker. And to make the learning of these words as easy and painless as possible, we have included a free software program that you can use. It is called Easy Train and it makes learning 80/20 Spanish fun, easy, and fast!

Let's get started, read on...

Language learning requires intensive study. Whether you want to learn to speak Spanish, learn to speak English, or some other language altogether, there are various learning techniques to study the language. However, for many learning styles, a computer program can help to teach the basics. A specialized software can help in reviewing grammar, punctuation, and even pronunciation during spare time. It should never be a substitution for a language class, but it can be a valuable addition for some people.

The very best language programs are built with the knowledge that they are not sufficient. Almost any leading-edge program will be built as a supplement to an existing curriculum.

There are three factors to be considered in language learning: effectiveness, adherence, and efficiency.

Effectiveness refers to what language you want to learn and the material to be used in learning the language. You need to choose and use the proper tools to make the language process effective.

If you want to [learn Spanish like crazy](#), there are many language courses available online.

Adherence is learning a language using the same process without getting bored. You may be too interested with the language but if the system you are using impedes this interest, it's time to reconsider. Thus, find a material that will suit you and your learning environment.

You may have the best material and adherence to your learn-to-speak-Spanish system, but it is still useless if it would take you a couple of years before you finally grasp the language. It is important that your method is simple, basic, and would allow you to communicate in the shortest period of time.

So basically, there are 100 spoken words, that if someone knows, they can get by with to communicate in any language. They wouldn't be fluent, or know any grammar/sentence structure type of thing, but if they knew these words, they could essentially communicate to someone in that language. According to Pareto's Principle of 80/20, it dictates that 80% of the results in any endeavor come from 20% of the input, material, or effort. By adapting this principle, it is now possible to prioritize material based on its recorded likelihood and frequency of usage.

By learning these basic words (which will only take a few hours,) you will be 80% there in knowing how to speak Spanish. So that is where you are best spending your time. Learning the other 20% will take months, and that is not the purpose of this book. This e-book will give you the basics to get by, but if you seriously want to learn Spanish comprehensively and properly, (the other 20%), visit learnspanishlikecrazy.org for information on a program that will do this. You can find below the list of 100 spoken English words in Spanish.

Good thing there is a free and versatile learning program available online to help you in learning Spanish the fun way! [EasyTrain](#) is a flexible program that can help a person learn vocabulary and ask multiple-choice questions depending on the level of difficulty. It was created to help people with various learning styles in using a user-friendly interface.

To use the software, download it [here](#). You can now start using the program. We have made it easy for you because instead of you having to create the database and set the program up by yourself, we already created a file with the words you need to learn.

Once you download the file, all you need to do is open this database of words and you're good to go! You can download them [here](#)

to use in the software. Once you have Easy Train up and running, with the database opened, the software asks you a question (from the database we have created for you), and then you type the answer. It then applauds when you get the answer right, so it is quite fun and enjoyable learning!

So that's it for your 80/20 Spanish language guide. Happy learning!
! (And keep in mind, if you'd like to master how to talk in Spanish fluently, I'd suggest you check out <http://learnspanishlikecrazy.org/>.)
